Content card fills

> Primary teal (#02B6B6) is the main brand color - use for all interactive elements (buttons, links, active tab indicators). Never use teal for body text.

DocConnect - Typography

Developer handoff • Type scale • July 2026

Type Scale - DM Sans

H1-Header	DM Sans Bold / 24px Page titles, large headings
H2-Sub-Header	DM Sans Bold / 20px Section headings, modal titles
H3-Title	DM Sans Bold / 16px Card titles, list item names
B1-Body Content	DM Sans Medium / 16px Primary body text, descriptions
B2-Body Content	DM Sans Regular / 14px Secondary text, metadata, captions
CTA-ButtonText	DM Sans Bold / 16px Button labels, action text

> Primary font is DM Sans throughout the app. Use Inter only for documentation. Ensure DM Sans is bundled or loaded via Google Fonts.

DocConnect - Key Notes

Developer handoff • 12 screens • July 2026

Flow Overview

- Auth is phone-based (OTP) - no email/password
- Bottom navigation has 3 tabs: Home, Discover, Chat
- Target users are healthcare professionals (doctors, nurses, medical students)

Onboarding

- Welcome → OTP Verification → Profile Setup → Home
- Phone number with country code (+91), 6-digit OTP with 30s resend timer
- Profile setup collects name, role, and avatar before entering the app

Home & Feed

- Scrollable vertical feed with post cards (text + images)
- Profile header shows name, specialty, and connections count
- Posts can be shared to chat directly from feed

Discover & Connect

- Browse suggested people in a card grid or search by name
- Each profile shows avatar, name, role, and connections
- Users can send a connect request from Discover

> Users must connect before they can message each other - there is no open messaging.

Messaging

- Chat list shows recent conversations with unread badges
- Chat supports text messages and shared post cards (include a "View" action)
- Share-to-chat supports multi-select - send content to multiple people at once

> Shared posts render as rich cards inside chat - not just links. Cards include a "View" action.

Content Creation

- Create Post supports multiple image attachments (grid + thumbnail strip)
- Simple text input - no rich text editor, no drafts, no templates
- Post CTA is always visible at the bottom
